PROFESSIONAL EXPERIENCE (in detail)

Custodiex, London

Chief Officer Officer

Mar 2022 – date (full-time)

My Community Finance, London

Chief Technology Officer

Jan 2021 – Oct 2021 (full-time)

Role:

As CTO, ownership of the technical direction, leading a talented, fast-growing offshore and onshore team, setting the vision of how technology will be used and lead the strategy for the various platforms including Lending, Savings, Payments and Data. Leading and shaping how the business works to achieve the strategic goal of operation excellence and be the visionary and driver of the technology strategy, in a hands-on role. Leading with a culture of best practice, vision, quality, and innovation with sound knowledge of commercial and technical management.

Accomplishments:

- Big ticket Epics delivered: 15 min Bullet Loans, Nationality and Companies House API, moving from salesforce to React for UI Portal, Launching a new internal (non-credit union) lending book for Amplifi/MCF, Top Up Loans / Rescheduling, Access management for queues and logons for Salesforce, GDPR Remediation & ISO 27001, Motor Finance, Decision Engine Roadmap, Office Move - Technology, Xero integration with Mambu for GL entry reconciliation, Open Banking via aggregator optimisations, automatic settlement quotes for customers via portal, .
- RFPs: Devised, delivered and vendor selected and programmes driven in Machine Learning / AI and Collection / Arrears Management System
- Cloud Re-architecture: AWS Usage and Cloud Architecture Optimisation including AWS Framework reviews and actions for stabilising and future proofing platform
- Product Evaluations: End to End Cybersecurity protection and immunity, for Customer Journey tracking analytics, for Email Management System; and for IT and software inventory tracking all our tech assets
- Resourcing Plan - Creation of graduate programme (hiring 3 new grads in June), replacement of offshore team members with onshore internal resources
- Vendor Management: Renegotiated Salesforce contract for 36 months - reducing payments in short term and moving from prepaid yearly to prepaid quarterly helping with cash flow
- Payments: Delivered improvements in Payments Processing Design and Financial Reconciliation Reporting
- Data: Delivered Data Strategy to enable Data Architecture, Data Optimisation, Data Lake and Repository management, Reporting and Analytics Support and Data Science and Machine Learning (for use cases to deliver: Price Discovery, AI Credit Scorecard, Fraud Detection, Underwriting automation for standard use cases
- NFR's: Reviewed and improved Non-functional requirements to improve Response Times & Net Processing Times, Capacity, Growth and Scalability, SL's and SLA's and Systems Management

Technology:

- Application Platforms/Partners/SaaS include:
 - Salesforce, Mambu, & Modulr Payments Platform, Cashflows, Truelayer, AccountScore, Lending Metrics (ADP), Experian, TransUnion, Equifax, Xero, OneTrust
- Technology stack includes:
 - Databases/Storage: MySQL8.0, Maria DB, S3 & Streaming Data Sources; ETL tools: AWS Glue, AWS DP, Athena, EMR; Language: Java, Python, HTML, CSS, JavaScript, TypeScript, Apex; Frameworks: Spring, Hibernate, Angular, Bootstrap, Lightning; Reporting tools: Power BI; SF Reports; Cloud: S3, CloudFront, EC2, ElasticBeanStalk, CloudWatch, API Gateway, Lambda, Certificate Manager, RDS; Analytics Engine: Apache Spark.

PAY-X, London

Principal Payments Consultant

Jan 2008 – Dec 2020 (consultancy basis)

Role:

Supporting client engagement with a wealth of commercial, business and technical experience at UK, European and global levels particularly in the areas of merchant acceptance, client management, new product development and EMV implementation in Europe.

Accomplishments:

- Workshops and consultancies focused around Payments Market Insights, Profit Optimisation, Future Proofing Payments Architecture, Vendor Analysis, Payment Systems Migrations, Fintech Payments Partnerships

Paysafe, London

Technology Consultant

Feb 2020 – May 2020 (contract)

Role:

Worked directly for the CTO, working with the leadership team and alongside the architecture team to produce a Technology strategy paper outlining the understanding of the business vision and challenges, architecture philosophy, business architecture view, IT architecture view (Infrastructure, Data & application), roadmap and key initiatives (for each of the value streams), KPIs & measurements and multi-year spend profile for Paysafe Group

Accomplishments:

- Delivered a consolidated presentation that articulated Paysafe's strategy, containing Group level breakdown, Digital wallets LOB, eCash LOB, Payments processing LOB and Back-office.
- Delivered a three-year technology roadmap including a Group High level solution architecture, a plan for transitioning from current state to target state including short / mid / long term actions and recommendations, recommendations on decisions to buy vs build vs refactor / consolidate, Major phases, Critical success factors and best practices for approach/TOM for recommendations, a technical design, NFRs and Software development life cycle.

Neue Capital Partners, New York / London

Fintech / Technology Advisor

Feb 2018 – Feb 2020 (consultancy)

Role:

Consultancy role with a VC, working with Fintechs (in Open banking, mobile wallet, digital, blockchain, mobile payments, IOT, Artificial Intelligence, Machine Learning, Data Analytics), who they are interested in investing in. Reporting criteria and analysis, via workshops and interviews included the Fintech's innovation, vision and strategy, people, product, and culture:

- Assist in thinking through the overall direction of the Fintech and where it sits relevant to other firms
- Assist in recruiting great engineering talent to build out the management team once engaged
- Assist in co-producing a business vision and marketing strategy that reflects the Company's competitive grid, challenges ahead and fulfilling its potential in its market as well as building case studies and funnel lead generation,
- Help design an architecture and model that can scale for potentially viable investments for the VC
- Help identify like-minded individuals that may accelerate Company growth, financial prospects and long-term success
- Help build a culture of greatness that can scale
- Help identify / introduce customers, vendors and partners in banking, to offer or facilitate product and services
- Offer ongoing insights to Company management to vendor solutions and recommend technical direction
- Offer support in co-producing and iterating investment decks and/or business plans that is attractive to investors

Accomplishments:

- Worked with a number of US, UK, Swiss and Israeli Fintechs in Wealth Management, Commercial and Retail Banking, Insurance, Mortgages, Cards and Payments.

E.ON, Nottingham

Principal Digital Architect / Lead Solutions Architect

Mar 2018 – Sep 2018 (contract)

Role:

Overall responsibility for architecture and design of digital landscape, providing digital leadership throughout the business unit for website, app and mobile solutions

Accomplishments:

- Managed overall application, technical and solution architecture
- Ensured technical requirements tied back to established customer goals, and strategy with solutions, which met non-functional requirements e.g. Performance/Resilience/Security/Maintainability
- Managed, coached and mentored team of solution architects in creating solution concepts & technical architecture
- Drove improvements in DevOps transformation initiatives like tooling, automated deployments and automation testing
- Led, technically and architecturally, the infrastructure transformation programme, moving all digital solutions from local data centres into the cloud (AWS)
- Exercised leadership as well delivery and support roles in outsourcing IT department to Infosys - onshore & offshore
- Involved in over sixty diverse projects from feasibility & quoting to full end-to-end architectural designs and delivery

Technology:

- Technology stack included SiteCore CMS, AEM (Adobe Experience Manager) 6.4, .net framework, MongoDB, AWS, Google Tag Manager, Google Analytics, and MEAN (MongoDB, ExpressJS, AngularJS, Node.js)

COGNI, New York, London

Co-founder and Chief Technology Officer

Jun 2017 – Feb 2018 (owned)

Role:

Led the technology strategy and implementation of the platform – using open banking, heading up the delivery of secure, resilient and scalable software to meet Cogni's objectives, comprising all aspects of design, architecture, and 24/7 operation

Accomplishments:

- Took responsibility & owned IT architecture and development offering banking services to the Gig Economy
- Built state-of-the-art applications on a tooling stack for mobile with modern technologies/frameworks
- Contributed and drove continuous improvements to development methodology and underlying processes
- Built and grew a development team onshore (New York) and offshore (Poland and India)
- Conducted all on-boarding and coaching of new IT staff and developers
- Supported and helped developers come up with the best technical solutions to follow architecture roadmaps
- Won a place on coveted FinTech accelerator, Techstars – New York – Class of 2017 – and graduated in Jan 2018
- Assisted Co-founder and CEO in securing 1st round VC funding – turned down option to work in USA fulltime

Technology:

- Technology stack is protected under an NDA – but is the standard for most Fintechs

HSBC Commercial Banking Group, London, Hong Kong, Pune

Head of DevOps Transformation - Commercial Banking

Aug 2016 – Jun 2017 (contract)

Role:

With proven experience as chief architect / deputy CTO and knowledge of tech trends to build strategy, the role required an understanding of budgets and business-planning as well as ability to conduct technological analysis. To succeed it required excellent stakeholder management skills with leadership / organizational abilities with strategic thinking to solve enterprise sized problems

Accomplishments:

"Dev" being Agile Development along with Continuous Integration and Testing and "Ops" being Deployment Automation and On-demand Environment Provisioning, DevOps together yields faster software delivery, reduced defects and increased business alignment. The two-year CTA programme to bring this about, included driving the following:

Architecture & Strategy

- Understanding where Architecture fits into the DevOps / Agile release cycle
- Defining, communicating, implementing and guiding strategic thinking, roadmapping, governance, evolving teams into thinking self-sufficiently about enterprise architecture
- Moving from building monolithic applications to applications driven by Microservices

Culture & Behaviour

- Driving change in culture & behaviour from teams reliant & dependent to self-sufficient & using their own initiative
- Chairing a team of DevOps champions and train the trainers to help with messaging, support and local drive
- Presenting regular global townhalls and roadshows in UK, Poland, India, Hong Kong and China communicating strategy and transformation programme progress

Frameworks:

- Agile frameworks such as SAFe, LeSS, Scrum, Kanban, Lean and others.

Methods & Processes

- Understanding of agile methods of software delivery and the principles and practices of Scrum, Kanban, Lean UX, XP

Organisational Design

- Part of small consultative team to define principles of OD, as well as structures, job definitions and support teams
- Rewiring of resources and working representing Commercial Banking (2,300) people who were being rewired into new roles, job families and Pod structures

People Agenda

- As head of people committee for Commercial banking globally, driving five initiatives around mentoring, talent management, diversity, rewards and recognition and job mobility
- Chairing and organising internally attended information sessions weekly at lunchtimes for people to log into from anywhere in the world and learn something new, see a demo, get a business presentation or a technical Q & A forum

Risk & Controls

- Defining how the new DevOps TOM ensures that operational risks are managed in accordance to the Group Standards Manual, Risk Functional Instructions Manual (FIM) and that these risks are continuously reassessed against changing

KAM PATEL

+44 773 677 8319

kam@kampatel.com

www.kampatel.com

economic and market conditions, legal and regulatory requirements, operating procedures and practices, management restructuring and the impact of new technology

Target Operating Model

- Representing Architecture in the TOM definition team working from the outset with engineering, operations & support
- Helping define success metrics and KPIs used to measure the success of the programme

Tooling

- Continuous Integration / Continuous Development - tools such as Jenkins, Git, GitHub, SonarQube, Nexus
- Agile Tooling for user stories/journeys and communications - Jira, Confluence, Slack
- Application Monitoring stack - Splunk, AppDynamics
- Development and deployment build tools such as Spring Boot, Maven and Tomcat
- Cloud & Microservices support platforms such as PaaS/IaaS - Pivotal Cloud Foundry, Docker, AWS, Mule API gateway
- Automation Tools tools/platforms like Ansible, Puppet
- Monitoring tools such as DataDog, AppDynamics and New Relic

Training, Learning Academy and Knowledge Management

- Helped compile training materials, presentations and games for Agile, DevOps and Scrum Master training
- Supported central team to give Product Owner training (one-day) to the business when trainers were in short supply

HSBC Commercial Banking Group, London, Hong Kong, Pune

Head of Business Management & Architecture Governance

Feb 2015 - Oct 2016 (contract)

Role:

This was a key role within the Senior Management Team supporting the Chief Operating Officer (COO) and Executive Leadership Team (ETL) to provide strong financial advice and overseeing the workload within the Operations department to ensure everything runs smoothly.

Strategic Planning

- Commercial Banking IT strategic planned establishing a repeatable IT strategic planning processes, and linked it to both the company's business strategy and enterprise architecture
- Realigned the Enterprise Architecture function including the internal target operating model to more of an agile adapted TOGAF framework-based model

People Management

- Worked with HR establishing workforce planning for the IT function, organisational development and adoption of processes and frameworks in architecture
- Provided staff leadership to assigned area of responsibility ensuring the employment of qualified staff, established clear performance objectives and regularly monitoring results to expectations
- Mentored and coached Chief Architects & lead architects driving towards a highly effective organization

Stakeholder Management / Communications

- Influenced key stakeholders / operational owners through well-articulated strategies using metric driven value statements
- Regularly presented to senior management, external organisation, and internal roadshows within regions with corporate updates

Budgeting

- Responsible for preparation & monitoring of budgets in accordance with policies and principles of sound fiscal management. Coordinating activities supporting an annual budget and submitting the final architecture department budget (\$13m).
- Developing and maintaining analytical tools for audit and control of programs.
- Ensuring financial administration and control duties for the entire IT Department are being followed and proper Clarity codes are being utilised for all projects by whole global team (65 full timers, contractors and consultants).

Architecture Governance

- Responsible for standardising global governance for architectural significant projects & programmes, business change and technical delivery
- Defined and implemented a quality governance framework, and project delivery methods, tools and processes deployed within the IS Operating Model, ensuring they are fit for purpose & deliver architecture to agreed standards.
- Define & implement governance controls/meetings & ensure they are fit for purpose in order to manage risk to an acceptable level.
- Oversaw a small offshore PMO group (in Krakow) ensuring that both the teams "build things right" but also "build the right things."

Sourcing

- Involved in sourcing and vendor management with an RFI / RFP to drive efficiencies, but also used sourcing more strategically to augment internal capabilities of IT department globally, increasing flexibility, and accessing new skills

Risk management

- Developed and maintained policies, standards, processes, systems and measurements that enabled the organisation to manage risk

HSBC Commercial Banking Group, London

Chief Architect - Customer Servicing & Customer Value Management June 2014 – June 2015 (contract)

Role:

Leadership role in Software Delivery (SwD) for Commercial Banking (CMB) Client Servicing & Customer Value Management supporting business systems and technology initiatives focusing on Customer Value Management and Customer Sales/Service Management. This area includes Customer On boarding, Client Management, Customer Relationship Management (CRM) and Regulatory (excluding Global Standards) Programmes

Accomplishments:

- A highly successful business-facing architecture advisor, thought leader and delivery leader with an advisory capacity involving working with IT, Change Delivery and Business leaders helping develop technology architecture strategies; communicate complex technology situations and their solutions and assess challenging technology problems providing advice and direction to resolve the issues
- In terms of thought leadership provided a point of view on new technologies and how they may be applied in pragmatic ways to deliver commercially sound and innovative ways of addressing new and existing business challenges.
- Owned and delivered architecture roadmaps for three functional areas (i.e. Customer Relationship Management, Onboarding and Regulatory (excluding Global Standards)) products
- Managed, mentored and coached 15-man team of enterprise architects, lead solution architects & solution architects and system subject matter experts engaged in each of the lines of business
- Demonstrated a forward-looking view (strategic and future proof) with roadmaps with an external looking view utilising latest trends of use of technology in the banking industry

Technology:

- Applications in the technology stack included over 3,500 listed in Troux with numerous EUC's running the Commercial Banking business in 72 countries

HSBC Commercial Banking Group, London

Lead Solutions Architect - CRM

Mar 2014 – June 2014 (contract)

Role:

Responsible for delivering solutions architecture on multiple CRM projects, working with functional and technical analysts to define the architecture on projects with large projects, using problem solving skills and the ability to deal with stakeholders at senior level to achieve desired results

Accomplishments:

- Drove and fully supported delivery capacity to architect, design and estimate complex Commercial Banking solutions particularly understanding the End to End Solutions and patterns in detail, an understanding of governance, system integration required, and framing and delivering a compelling argument
- Defined architecture for CRM solutions in accordance to design authority governance
- Championed architecture method and practice including solution components and interfaces definition techniques sufficient for engineering team to prepare technical specifications
- Ensured that architecture deliverables are compliant with the stated requirements, approved technologies, best practices and group strategies
- Ensured that designs are technically coherent and future proofed as well as compliant with internal and external technology standards and regulatory obligations
- Fully aware of operational risk including its identification, assessment, mitigation and control
- Developed an expert-level understanding of the internal CRM Group systems, tooling, development suite & strategies
- Assisted the programme teams to work breakdown for planning and provided L0 estimations for development effort for new projects and programmes
- Reviewed code and documentation to ensure solutions met the design criteria and work is of an acceptable quality
- Worked with IT Operations to ensure designs conformed to infrastructure technology standards & operational requirements

Technology:

- Applications in the technology stack included ClientVision, Salesforce, Microsoft Dynamics, CVM Tool, Crystal Reports

LLOYDS BANKING GROUP, London

Senior Payments Solutions Architect (Global AML)

Jan 2013 – Feb 2014 (contract)

Role:

Senior Payments Architect working within Payments EAD on three-year Programme GAML: Creating a best in class Global Anti Money Laundering capability

Accomplishments:

- Worked as a lead architect/consultant with Architects, Business, Executives, Operations and Development teams including third party vendors (Actimize, PEGA and Fircosoft) to roadmap and provide the technical and strategic vision for Lloyds future Anti Money Laundering capability
- Programme includes supporting current operations teams and short-term fixes, a 90-day plan to stabilise the current platform, increasing the scope of AML to include further automation and integration of other systems covering Swift transactions and Credit Card, Mortgages and Loans
- Developed an end-to-end roadmap to include all facets of risk including Customer Onboarding / Trigger, KYC Assessment, Intelligence & Risk Assessment, Customer Activity & Transaction Monitoring (Sanctions, Screening and AML), SAR Reporting & CPO and Disclosure & Exit, Prevent Re-Entry. The programme is global so will cover Retail, Wealth, Commercial, Insurance and Consumer Finance
- Provided vision to build a global end-to-end Global Anti-Money Laundering monitoring system from discrete loosely coupled flexible components that are best of breed, standard and strategic within LBG including source Data (Transactions and Customer Information), AML Transaction Monitoring & Alert Generation (Currently Actimize Monitor, Case Management system with Workflow (Lloyds standard being PEGA), Event Management & Complex Event Processing (Event Relationships), SOCA Disclosure and MI for Business Operations, Assurance, Audit and System Management (Business Objects)

Technology:

- Applications in the technology stack included Actimize, PEGA, Fircosoft & Business Objects

LLOYDS BANKING GROUP, London

Senior Payments Solutions Architect (Project Verde)

Aug 2011 – Jan 2013 (contract)

Role:

Senior Payments Architect working within Payments EAD for Project Verde: Divestiture of over 600 branches, a number of brands and 10% of Lloyds portfolio to Co-operative Banking Group

Accomplishments:

- Delivered payments solution for Project Verde by understanding of payments transaction life cycle: Messaging flow through capture, routing, formatting/translation, transmission and auditing for Lloyds Banking Group
- Understood the payments transaction life cycle: Messaging flow through capture, routing, formatting/translation, transmission and auditing for Lloyds Banking Group.
- Represented Payments workstreams as senior architect for BACS, CHAPS, Faster Payments, International SEPA Payments, Anti Money Laundering (AML), Screening, Sanctions, FSCS, Clearing, Cash and Travel including understanding all E2E solutions and changes for Verde
- Liaised with all Verde workstreams including Customer, Loans, Credit Cards, Distribution, Banking Operations, LP&I and GI, Intelligent Finance
- Reviewed and approved all OSD's (Outline Skeleton Designs) and 75 E2E for all twelve workstreams for entire Verde programme to understand cross dependencies into and out of Payments and group programme interlocks with other major programmes within Lloyds Banking Group
- Production of End-to-End FSCS design working with IT project team, ADM, Business, QA Test team and third parties: Unisys, Experian, GB Group and GH Group. Responsible for E2E Cash design working with IT project team, ADM, Business, QA Test team and third parties and applications: Autorek, G4S, and ICOM.
- Reviewed and remediated all applications in terms of their User Access security model for Verde used by operations teams supporting both Verde and Lloyds Banking Group
- Part of NDAed-team to understand roadmap for payments and future strategy for Stream E with Co-op Banking Group

Technology:

- Applications in the technology stack included over 70 listed in Troux with numerous EUC's Lloyds Banking business

BARCLAYCARD (part of Barclays Bank PLC), Northampton

Portfolio Lead Solutions Architect

Nov 2010 – Aug 2011 (contract)

Role:

Senior Architect working on delivery of all projects in the Commercial Card Portfolio for 2011. Role includes Planning, Resourcing, stakeholder management and team management of six architects

Accomplishments:

- Projects architected and designed in portfolio included International Expansion, Geographies and Currencies, Total Spend Management, International Lodge Tracker product, Contactless, Prepaid card, Central Travel Solutions, Self Service, US and Asia Expansion, Salesforce CRM, Single Use Accounts, Buyer Initiated Payments, Regulatory and Mandatory projects, Account Boarding refresh, Automated DD, small changes, and a secret squirrel acquisition project including full migration with third party

Technology:

- Platforms included TSYS (TS2), VisionPLUS, CardPac, Triumph, Base24, Falcon Fraud Management System, Abinitio, SAP GL, Settlements with Visa (VROL) and MasterCard (Mastercom), Experian, UN Sanctions, Visa Intellilink, CentreSuite, Dialogue, Triad, Sentinel (SEPA DD Font End), PEGA, RSA (3dSecure), RR Donnelly Print services, Oberthur and Germalto card production

SCOTTISH WIDOWS (part of Lloyds Bank Group), Edinburgh

MDM Solutions Architect

Feb 2010 – Oct 2010 (contract)

Role:

Senior Architect working on delivery of Master Data Management (Customer Data Integration) solution for integration of platforms to consolidate cleanse and synchronise a single version of the truth (Golden Records) for master data within the Scottish Widows, Lloyds Bank, HBOS and Clerical Medical heterogeneous application landscape.

Accomplishments:

- Delivered all artefacts for project from RFP, short-listing vendors, reference site visits and recommendation to End to End (E2E) design according to Lloyds Bank Governance standards
- Comprehensive evaluation of products and solutions from IBM (MDM Server/DataStage) Oracle (UCM Solution), Siperian (Multi-domain MDM Hub Solution) and SAP (NetWeaver Solution)
- Produced all facets of architecture and design within the realm of Master Data Management, the creation of architecture for build, roll out and deployment of customer master and product master hubs
- Also worked closely with Data Architects, directing the design, development, review, documentation, and implementation of data models and metadata structures for enterprise-wide relational database applications
- Supported teams in the analysis of data assets and to research/evaluate/support the adoption of Enterprise Data Models (EDM) and best practices
- This role was focussed on turning around a project, which was facing challenges in a complex environment. The end result was a radical change in vendor choice and architecture, a transformed End 2 End solution, which passed rigorous divisional and enterprise governance and a project successfully delivered into design and testing

Technology:

- Applications in the technology stack included MDM Server, Datastage ETL, and internally built applications

SCOTTISH WIDOWS (part of Lloyds Bank Group), Edinburgh

Business Transformation Solutions Architect

Sep 2009 – Feb 2010 (contract)

Role:

Senior Architect working on delivery of a Natural Language Interactive Voice Recognition (NLIVR) system across Scottish Widows, Lloyds Bank, HBOS and Clerical Medical from RFP, short-listing vendors, reference site visits and recommendation to End-to-End (E2E) design according to Lloyds Bank Governance standards

Accomplishments:

- Led and drove Procurement process for project included working with BT, IBM, Nuance, Dimension Data, Sabio and VE Commerce using site references including Egg Bank, Standard Life and Sky Television Contact Centres
- Delivered artefacts from Outline Solutions Design (OSD), to Group Governance, across three divisions of Lloyds Banking Groups Life Assurance, Investments and Pensions including Scottish Widows, Clerical and Medical, and Halifax Financial Services
- Customers for solutions included Independent Financial Advisors (IFA's), Lloyds and Halifax branches and end-users
- Other project deliverables included feasibility assessment of Business Transformation projects including Bancassurance Extranet project, Lean Processing project, Corporate Re-Engineering, Business Re-Engineering,

KAM PATEL

+44 773 677 8319

kam@kampatel.com

www.kampatel.com

Ecommerce, Evaluation and feasibility of PegaSystems CRM/fraud management tool, Data Warehousing project, MI with MicroStrategy/SAS portal and other Strategic projects across lines of business

- Projects involved multiple technical environments from differing organisations with a high level of customer interaction
- Architectural designs driven by requirements included high-level design, coding/programming, testing, installation, low level design documentation, maintenance and support directives
- The production of detailed component specifications from systems architectures, taking into consideration the intended uses of the architectures as a whole within systems integration
- Also delivered the overall architecture and control of designing systems and contributing to the choice of iteration patterns of the development phases

Technology:

- Applications in the technology stack included BT, IBM, Nuance, Dimension Data, Sabio PegaSystems, MicroStrategy/SAS, Datastage ETL and VE Commerce

CAPITAL ONE, Nottingham

Lead Transformation Architect / IT Project Manager

Feb 2009 - Jul 2009 (contract)

Role:

Accountable for the overall architecture, solutions design and delivery of Transformation projects, to save £16.7m from the bottom line. Other projects included disposal of Savings business, data centre reconsolidation, vendor changes, network rationalisation and integration, building moves, improved processes cross lines of business and simplification of contacting customers online

Accomplishments:

- Main project was as Architect and IT lead performer in secret squirrel project disposing of Savings business, started in February, announced in June and delivered by July. The project was only open to a handful of Capital One employees, hence the IT project management was also managed by myself supporting the programme manager, who dealt with tri-party non-IT project management
- Working cross party and often led IT teams from Newcastle Building Society (Service), Skipton Building Society (Buyer) and Wipro (IT services), IBM (IT infrastructure) and AT&T (telephony services)
- Responsible for driving all IT elements during RFI, RFP, selection, contract negotiation, architecture, design, integration, migration, project management and phase one delivery

CAPITAL ONE, Nottingham

Senior Solutions Architect / Project Manager

Jan 2008 - Dec 2008 (contract)

Role:

Main project which lasted ten months was the outsourcing of the UK call centre, from writing RFI and RFP to creating a model to evaluate them to being the lead IT performer, IT Project Manager and lead architect, through requirements gathering, architecture, design, testing and implementation including integration and migration of current and new systems. Worked with companies in India (Wipro) and Philippines (Iqor), who won the tender and resulted in being the outsourced call centre

Accomplishments:

- As an architect on other projects, was responsible for developing domain and solution architectures for either a specific line of business or at an enterprise level (cross-line of business)
- Operating predominantly within the Feasibility and Definition phases of a typical SDM project lifecycle, with some involvement in the Design phase and Ideation process
- Creation of feasible solutions assessments within the feasibility phase of projects, on behalf of the architecture sponsor (enterprise or business architect), where required
- Creation of architecture deliverables within the Definition phase of a project on behalf of the architecture sponsor (enterprise or business architect)
- Updating the Requirements Traceability Matrix with mappings of architecture to System Requirements
- Technical management of the transition of projects from the Definition into the Design phase
- Technical input to new 3rd party technology selections
- Approval of project high level designs on behalf of relevant architecture sponsor
- Approval of project technical designs on behalf of relevant architecture sponsor
- Providing estimates for architecture effort in feasibility and definition phases
- Ensuring that all deliverables adhere to architecture process quality requirements and TOGAF
- Ensuring that all architecture deliverables meet stated Business and System Requirements and comply with all Enterprise Architecture Standards
- Ensuring all architecture deliverables are reviewed and approved by the European Architecture Review Council and addressing any action points arising from the review, where appropriate

KAM PATEL

+44 773 677 8319

kam@kampatel.com

www.kampatel.com

- Collaborative working relationships with MasterCard, Visa, TSYS, Wipro, IBM, Oberthur & IQOR
- Projects as Lead Architect include Call Centre Outsourcing Vendor Selection, Call Centre Outsourcing (Philippines), Dialler Upgrade, CRM//Fraud Tools including PEGA, Remedy and Oracle CRM, Secure Wireless Internet Guest Access, Data Centre Decommission, Building Enhancement Programme, RFID Contactless Card, Microbusiness Card and many more
- Delivered the project to time and cost outsourcing the call centre in ten months

Technology:

- Technologies including Citrix, UNIX, TSYS (TS2), Data Warehousing, BI, ETL with vendor partners and MI reporting technologies, Microsoft .Net, Java with RDBMS (Oracle and Sybase), speech technology; telephony infrastructures (PSTN or VoIP); a wide variety of backend systems (e.g., CTI, Billing, and CRM systems); Java application servers (J2EE) object oriented environments, network systems, hardware and server sizing, web services technologies, e.g., SOAP, XML; and scripting languages and relational databases

BRITISH TELECOM PROFESSIONAL SERVICES, Ipswich, Makati, Singapore, Vietnam

Lead NGN Voice Architect - Overseas

Apr 2007 - Dec 2007 (contract)

Role:

Responsible for voice and NGN elements of all tenders, bids and professional services offered by BT to external companies

Accomplishments:

- Led architecture and project management responsibility for a NGN migration strategy from TDM/GSM based architecture in the fixed-line and mobile telephony market to NGN including full service portfolio
- Projects worked on included PLDT (Philippines), VietTel (Vietnam), Turk Telekom (Turkey), NTS (Indonesia), Maxis (Malaysia), STC (Saudi Arabia) and a number of UK carriers
- Validated and assessed existing network strategy aligned with market and business strategy, with regard to NGN development and existing NGN facilities
- Designed a full NGN network with service oriented NGN target network architecture meeting demands on capacity, subscriber growth, service diversity, openness
- Designed an operational model for the All-IP infrastructure
- Designed methodology for traffic forecasting, network dimensioning and traffic engineering
- Wrote proposal and defined a migration strategy as well as technology and services/products roadmap that led to the NGN target architecture
- Validated various migration scenarios (technically, operationally, commercially) and selected an NGN strategy with a forward-looking NGN Business Plan
- Prepared a comprehensive NGN Tender document issued to potential vendors with subsequent tender evaluation and vendor selection
- Supported NGN infrastructure implementation process for all network layers, especially for pilot and interoperability, network, performance & acceptance testing
- Drove end-to-end solution encompassing Backhaul, access, IP & TDM transmission, switching, OSS, BSS, Plan & Build
- Worked with mobile companies including PLDT mobile, VietTel and Turk Telekom on Next Generation mobile. Telco environments including 3G & GPRS IMS (IP Multimedia Subsystem) Voice over IP Security XML, WML, and HTML
- Demonstrated ability communicate to stakeholders at all levels any design and project related information required

BRITISH TELECOM WHOLESALE (21C), Brentwood

21CN Architect - Design

Oct 2005 - Jun 2007 (contract)

Role:

Responsible for detailed design and validation of carrier scale Voice Services and Voice Components for BT's 21C Network, and supporting Voice Services on the existing PSTN

Accomplishments:

- Working within a larger design team, with multi-million-pound budgets, delivering networks to BT Lines of Business and directly to external customers
- Responsible for leading significant design tasks, working with clients to define requirements, document scope, validation activities and manage teams to deliver low level designs
- Working with vendors developing design and validation of voice network components (e.g., Call Server, Routing Database, Media Servers, Media Gateways and MSAN's), including such aspects as Performance Engineering, Scalability, etc
- Responsibility for technical leadership of team deliverables in the following areas internally to BT:
 - High Level Solutions Design for 21C NGN Interconnect trial and rollout, OSS, Process and Management Interfaces in to OSS/BSS including IP infrastructure Authorisation, Authentication & Accounting (AAA)

KAM PATEL

+44 773 677 8319

kam@kampatel.com

www.kampatel.com

- Plan and Build Low Level Design for 21C for first eight iterations
- Vendor KPI's at box level to show contributions to delay to dial tone, post dial delay and post answer delay per component
- Working with vendors on design and Implementation teams
- Full design including integration and migration between OSS, process, plan and build and Operations
- Represent Design Signalling team on bi-weekly Design Council
- High Level Solutions Design for NGN IP Interconnect solution for 21C trial with other carriers
- Using good practice including full understanding of TOGAF

VOIPSTERS Ltd, Leicester

Founder & CEO
